MLS DECISION DAY

250

distinct feeds from 15 matches, per MLS's Seth Bacon

15 MATCHES, PROBABLY 250 FEEDS, ONE BUILDING

How MLS Productions runs the season's busiest day from Stamford, CT

SWIPE →

THE WORKFLOW

SHOT AT THE VENUE, SWITCHED IN STAMFORD, CUT FROM LONDON

1 **CAPTURE**

Camera feeds from REMI venues reach Stamford over AT&T's GVS network.

2 **SWITCH**

They land on SimplyLive servers in Stamford's equipment room. The switching happens there.

3 **DIRECT**

IMG directors at Stockley Park in London cut the matches on SimplyLive surfaces.

4 **GRAPHICS AND ADS**

Each feed passes through AE Live graphics and TGI's virtual-ad insertion.

5 **DELIVER**

Audio is mapped to each language in Dallas. Apple handles distribution and versioning.

2028-29

Renegotiated Apple deal ends after the 2028-29 season

WHAT CENTRALIZING CHANGED

WHAT ONE BUILDING CHANGED

1 SETUP TIME

In year one, a graphics operator spent the first five or six hours of a 10-hour day setting up.

2 REHEARSAL

Now operators are in Stamford two or three days before a match, building graphics and rehearsing.

3 SMALLER TRUCKS

REMI crews onsite are camera operators, a technical manager and an A1. There is no producer, director or TD.

4 FRAME-ACCURATE GRAPHICS

The SimplyLive servers and the Viz engines are in the same building.

“

But, if you ask any one of them now, they'll tell you the product is better than it was before.

JASON SAGHINI

VP, live production, MLS
